FLOATING CONVEYORS

Whenever you need to move material from a floating dredge to land or across a body of water instead of around it, you will want to use **Supreme** floating conveyors.

Whatever your production needs, we can design a system with the correct belt width and speed to move your material. Our quality painting or custom galvanizing will give your conveyors many years of service.

Located in Stoneboro, PA, we are proud to say that our floating conveyors are "American Made" **by** sand & gravel producers **for** sand and gravel producers. Our experienced staff is waiting to help you with your conveying needs.
